## Skills

- Java
- SQL
- Software Testing (ACCELQ)
- C/C++
- API
- JavaScript
- Python
- Critical Thinking
- Communication & Collaboration
- Time Management

## Awards & Certifications

**National Merit Finalist**  
National Merit Scholarship Corporation  
**Feb 2022**

Awarded a \$3000/yr corporate-sponsored scholarship from Liberty Mutual.

**Eagle Scout**  
Scouts BSA  
**Feb 2021**  
🔗 <https://tegacaysc.org/1669>

Completed a service project and various other requirements to earn the rank of Eagle Scout. Also a member of the Order of the Arrow, a service-based honor society. Completed a year long term as a Senior Patrol Leader (SPL) for my local Scout Troop.

**Wild Card**  
Clemson / CUHackit  
**Oct 2023**

My team won the "Wild Card" award at Clemson University's "Hello World" freshman-only hackathon in 2023.

**Private Pilot Certificate**  
FAA  
**Sep 2022**

Received my Private Pilot Certificate (Airplane Single Engine Land), and have flown over 80 hours in a Cessna 172.

I am a **Clemson University Honors** student majoring in **Computer Science** and minoring in **Mathematics** and **Physics**. I have earned my **Private Pilot Certificate** and have over 80 hours of flight time. I have played piano for 10+ years, and enjoy spending time with friends & family. I like tinkering with computers and also enjoy reading (Sci-Fi is my favorite genre!).

## Profiles

- [gsatkin](#)
- [GCPins](#)

## Experience

**Clemson University** **Aug 2024 - Present**  
Teacher's Assistant  
Clemson, SC

Work with other TAs to lead a Computer Science lab (when applicable) and assist the professor with grading. Help students with assignments, answer questions, and host weekly office hours.  
COURSES: CPSC1021 (2 semesters), CPSC2150 (1 semester)

**Amwins** **May 2025 - Present**  
Intern / QA Engineer  
Charlotte, NC

Created automated workflows for testing applications in DEV, IST, and UAT environments. Utilized the ACCELQ software to create actions, contexts, and scenarios to efficiently and effectively test applications. Collaborated closely with mentors and fellow interns to identify and log bugs.

**Super Chix** **May 2024 - Aug 2024**  
Hospitality / FOH  
Fort Mill, SC

Communicated with a team to provide impeccable customer service. Took orders at the register and assisted customers in the lobby. Bussed tables, maintained a clean and safe workspace, and served with a smile.

**Mathnasium** **Apr 2021 - Jan 2023**  
Math Tutor / Instructor  
Fort Mill, SC

Used provided materials to teach students K-12 mathematics. Assisted with school homework problems and other assignments when appropriate. Helped high school students with statistics, calculus, and PSAT/SAT prep.

## Education

**Clemson University** **Aug 2023 - Present**  
Computer Science  
Bachelor's  
4.0 GPA

I am currently a junior at Clemson University, a member of the Honors College, and hold a 4.0 GPA. I have been on the President's List for the Fall 2023, Spring 2024, Fall 2024, and Spring 2025 semesters.

## Projects

**"AltSpeakify" - CUHackit 2025 - Clemson Hackathon** **Mar 2025**

Created an accessibility-focused browser extension for the hearing impaired.  
🔗 <https://github.com/GCPins/AltSpeakify>

This Manifest V3 browser extension was created with JavaScript and is designed for those with hearing impairments to better navigate the web. The extension plays a tone whenever the user moves the mouse over an image on a web page, then the user can opt to press a configurable keybind/hotkey to trigger the primary function of the extension. The extension utilizes vision model APIs to retrieve a clear and detailed description of the image. This description is then passed to a text-to-speech API and outputted in a configurable/customizable voice to the user.

javascript, api, vision model, tts, ai, git

**"img2ascii" - CUHackit 2024 - Clemson Hackathon** **Mar 2024**

Created a fun website to convert an uploaded image into "ASCII-art".  
🔗 <https://github.com/GCPins/img2ascii>

This project was created for the Clemson CUHackit 2024 hackathon. The website allows you to upload an image, choose a scaling factor (resize the image), and then generate ASCII art from the uploaded image. You also have the option to save the resulting ASCII to a text file or copy it to your device's clipboard. The project was made with Python (for the ASCII conversion and Flask backend) and HTML/CSS (for the simple frontend).

python, flask, html, ascii, image processing, nginx, git, web development

**"cscope" - HelloWorld 2023 - Clemson Hackathon** **Oct 2023**

Won the "Wild Card" category at Clemson University's 2023 Freshmen-Only Hackathon  
🔗 <https://github.com/GCPins/cscope>

Clemson Hello World 2023 project to manage GradeScope submissions with a GUI made in the Godot Engine and a Python backend. The Python backend can also function as a standalone CLI version of the program, which is intended for use on the Clemson School of Computing virtual machines. This project was the winner of the "Wild Card" award.

python, backend, web scraping, selenium, SSO, git
